Coastal Engineering, 20 (1993) 349–350
Elsevier Science Publishers B.V., Amsterdam

Contents Volume 20, 1993

Research papers
Effects of breaking wave induced turbulence within a longshore current model
J.C. Church and E.B. Thornton 1
Nonlinear evolution of a unidirectional shoaling wave field
Y. Agnon, A. Sheremet, J. Gonsalves and M. Stiassnie 29
Economical random wave propagation modelling taking into account non-linear amplitude dispersion
Y. Zhao and K. Anastasiou 59
Numerical solution of the elliptic mild-slope equation for irregular wave propagation
B. Li, D.E. Reeve and C.A. Fleming 85
Waves and currents on natural beaches: a quasi 3-D numerical model
M.-H.G. Briand and J.W. Kamphuis 101
Sediment transport in the surf zone: a quasi 3-D numerical model
M.-H.G. Briand and J.W. Kamphuis 135
A note on the three-dimensional shear stress distribution in a surf zone
R. Deigaard 157

Technical note
The wave vane — a device to measure the breaker angle
P. Chandramohan, B.U. Nayak and N.M. Anand 173

Book review
Computer Modelling in Ocean Engineering 91, by A. S.-Arcilla et al. (Editors) — M.J.F. Stive 183

Announcements 184

Research papers
A Boussinesq model for waves breaking in shallow water
H.A. Schäffer, P.A. Madsen and R. Deigaard 185
Wave spectrum filtration by current and wave height calculation
I. Kantardgi and Y. Dreyzis 203
Laboratory wave reflection analysis using co-located gages
S.A. Hughes 223
Wave groups: a closer look at spectral methods
D. Masson and P. Chandler 249
Bed shear stress measurements over a smooth bed in three-dimensional wave–current motion
M.M. Arnskov, J. Fredsøe and B.M. Sumer 277
Wave boundary layers in a convergent tunnel
B.M. Sumer, T.S. Laursen and J. Fredsøe 317
